

# Betterflye Content Management System

Client: Virginie McNamar, Betterflye LLC

# Mentor Feedback

## Mid Iteration

- Michael liked completed org admin delete feature
- Noted we should pull latest branch updates asap, to ensure code merging is smooth
- Liked that library feature will make for an easier transition at the end of the semester

## End of Iteration

- Approved of all completed features
- Suggested a new feature: organization admins can view flagged posts.

# Client Feedback

- Approved of all features, we are meeting expectations
- Liked that we implemented the Org Admin features in response to previous feedback
- Said our new features covered her clients' major concerns
- Wants minor UI changes
- For next iteration:
  - She would like the ability for Org Admins to prescreen posts
  - less focus on the ability to filter uploaded photos

# Mentor/Client Software use

- Mentor is already familiar with software since most of it he built
- Michael noted that the “Ban User” button was misaligned compared to the rest of the buttons and tabs in the settings page, suggested to move it inline similar to the other controls
- Virginie recommended we move the Ban users tab down farther in the settings, rather than being the first setting on the page, for style purposes.
- Virginie also recommended adding viewable list of banned users in an organization, as well as an option to unban users.

# Student Symposium

- Our client clarified that we would be able to present any aspect of the project that we need to
- We will talk to our client again about our presentation before the symposium

## 5th Iteration Features

- The filter shall be able to process and extract information from images using a neural net
- Organization Admins shall be able to view the flagged posts for their organization
- Organization Admins shall be able to pre-approve user posts to their organization page

# Teamwork: Sara

- added Cypress UI testing to cover all previous work
  - updating user information, posting Thoughts of the Day, flagging posts, deleting and resolving flagged or blocked posts for Admin

# Teamwork: Dan

- Added functionality for organization admins to be able to ban users from their organizations with Jake's help

# Teamwork: Daniel

- Added functionality for Organization Admin to delete user posts from the organization

# Teamwork Jake

- Designed the library feature, created second database, reworked functions to minimize source code written in Betterflye repository

# Interesting Fact

Part of the Indiana Dunes National Lakeshore is Pinhook Bog, located west of La Porte, and is home to very diverse and unique flora, including several carnivorous plants, orchids, and tamarack trees. This bog was formed around 15,000 years ago.
